### WARNING:

To avoid cracking, do not store or use in cold temperatures (below 32° Fahrenheit or 0° Celsius).

The rain canopy must be removed before placing or removing child from stroller seat. Do not allow child to enter or exit through zippered opening.

**NOTE:** It is not necessary to lay your stroller handle on the ground or remove the wheels to attach the rain canopy to your stroller. The handle was laid on the ground and wheels were removed for illustration purposes only.

**NOTE:** When seat is not in reclined position, the rear flaps of the rain canopy can be snapped together for a tighter fit.

**NOTE:** The zippered opening on the front of your Rain Canopy provides quick and easy access to your child.

The sample product shown on this manual may differ slightly from your production quality Rain Canopy. This will not affect the assembly or functionality of your Baby Jogger product.
